

⇒ guo – Business Development was recently invited by the Clean Transportation Fuel initiative of Akershus county and Oslo administration for their interest in carbon emission-free Hydrogen from dry thermo catalytic Methane. The Oslo region has successfully launched the implementation of a public busses and waste collection vehicles fueling infrastructure from LBG off Oslo's sewage plant and F&K waste digester plant in Romerike (60km outside Oslo). Promising test results from HFC busses in public services have brought the Akershus county's mayor's attention towards Hydrogen as the even cleaner solution.
